THURSDAY, JUNE 17, 1937

— or Else!

In 1930, the Federal debt was \$16,000,000,000. Today it approaches \$36,000,000,000—because in recent years Federal expenditures have exceeded revenue by about 100 per cent.

Thus we are now in a position similar to that of the post-war days, when the nation faced a tremendous debt, largely occasioned by loans to foreign powers. After the war, however, the government operated with reasonable economy and efficiency, and the debt was steadily cut down. Today the debt reduction problem is not so simple, for the Federal government, to an extent hitherto unknown, has become a vast and constantly expanding bureaucracy that costs us more than \$7,000,000,000 a year.

Senator Byrd of Virginia, one of the few congressional advocates of real economy, has cited some astounding figures. The Federal civil executive payroll—excluding relief, military and pension rolls—grew at the rate of 1,000 persons a month between December, 1934, and September, 1936. It now costs the taxpayers \$1,500,000,000 a year. And so rapidly has this bureaucracy expanded its operations, that more than 85 per cent of the personnel is employed outside Washington.

Senator Byrd says also, citing another example of bureaucratic growth: "In March, 1933, the government was leasing 6,084 buildings or parts of buildings outside of Washington. Between then and July 1, 1936, the leased number rose to 11,842, although in the meantime the government has built 664 new buildings at a cost of \$329,000,000."

Worst of all, perhaps, is the fact that in the face of recovery made from depression, we are still spending at an "emergency" rate. Here is an intolerable situation that must soon be corrected—or else!

* * * * *

The Supreme Court Score

The United States News recently compiled what it terms "The New Deal's 'Won and Lost' record in the Supreme Court."

Two Court terms have been concluded in which Administration measures have been decided. In 13 cases, the Administration has been sustained. In 11 it has lost.

Cases in which it has been upheld include such measures as: Gold devaluation, the TVA, the arms embargo, the silver purchase policy, the 2nd Frazier-Lemke farm mortgage moratorium act, the social security measures.

Cases which it has lost involved the NRA, the AAA, the Guffey Coal Act, the Rail Pension Act, and the Municipal Bankruptcy Act.

Most favorable to Administration laws, says the News, was Mr. Justice Cardozo, who cast 19 votes for New Deal laws and 5 against.

Most unfavorable was Mr. Justice McReynolds—5 for New Deal laws, 19 against.

It is interesting to note that Mr. Cardozo was appointed by a Republican—President Hoover; Mr. McReynolds by a Democrat—President Wilson.

* * * * *

Democracy vs. "Isms"

The only workable form of democratic government which the world has ever known is not based upon the theory that everybody should have absolute liberty, but rather that everybody should have as much liberty as possible without hurting the whole society. Unrestricted liberty for all is anarchy. Complete liberty for special groups leads to Communism or fascism or some other "ism."

It is strange, therefore, that some Americans who

prize their democracy should let one group in its society have almost complete freedom from control. Labor unions have fewer legal restraints upon them than any other group, yet every day they demand and take more freedom.

It used to be a crime to interfere with United States mails. Yet now in the Mid-West, strike pickets are censoring mail before they let it go into factories.

It used to be that a man could work if he wanted to. Yet now strike pickets are making men go on relief by refusing to let them work.

It used to be that a man could either join or refrain from joining a union. Yet it is reported that a recent Chrysler plant sit-down strike was called to make some union members pay their dues and to force others to join.

It used to be that a man did not have to belong to a union to hold a job. Yet a General Motors sit-down strike was threatened because two unionists did not like to work alongside two non-unionists.

It used to be that when a man worked hard and long and built himself up a business he could run that business. Yet another sit-down strike recently forced such a man to retire from control of his business.

It used to be that a contract was a contract. Yet there have been nearly three-score sit-down strikes in automobile plants since contracts were signed forbidding them.

Where and how must it end? In another "ism" or the restoration of real democracy?

* * * * *

Social Security or Insecurity

The Supreme Court has just upheld a statute designed to protect American workers against unemployment and a helpless old age—the Social Security Act. A little impartial thinking must raise doubts as to whether that "security" is as "secure" as we would like to believe.

In the first place, employers will, through taxes, provide two-thirds of the money set aside for old-age pensions and unemployment insurance. The employees will contribute the other one-third. It behooves us, therefore, to consider the steadiness of the source of the two-thirds of the money.

Isn't it logical to assume that social security isn't secure unless the employers are secure? If the employers are forced out of business, where will the money come from?

When times are good, there will be little to worry about. But Congress has enacted another law which strongly discourages the creation of reserves to pull manufacturers through hard times. It has, in fact, levied heavy punitive taxes on such reserves. It is an admitted fact that few employers, when another depression comes along, will have enough reserves to let them spend more than \$26,000,000,000 out of their savings as they have done in recent years. They won't have the savings.

Furthermore, it is now proposed to lay new and heavier burdens upon them by adopting a shorter week so as to spread employment. Unless an employer who hires five men to do the work that four did before increases the cost of what he sells, he will be put out of business. If he does increase the cost, he will have trouble selling, and maybe again be put out of business.

When tax sources dry up, there are no taxes. Unless the sources of taxes are secure, there can be no social security.

* * * * *

How Russia Punishes

Drunken Auto Drivers

Driving while intoxicated in Soviet Russia is a good way to insure being withdrawn from circulation, latest press reports indicate. Recently a "comrade" took on more vodka than he could absorb, drove through a safety zone in front of a foreign embassy and killed two pedestrians. He also sent eight others to the hospital. A few days later a terse little announcement in the local press told what had happened to the comrade. He had been executed.

Such drastic action is not advocated, but we believe that greater pressure should be brought to bear upon those "maniacs of the highway" who insist upon getting behind the wheel of a car after they have been drinking.

* * * * *

WILMOT

Virgene Voss is home from Union Grove for the summer months.

Mr. and Mrs. Charles Olsen and daughter, Fort Atkinson, spent Sunday with Mr. and Mrs. Ray Rudolph.

Grace Sutcliffe returned to Oak Park Sunday after a vacation with her parents, Mr. and Mrs. John Sutcliffe. Mr. and Mrs. Robert Hultzer, of Oak Park, were at Sutcliffe's for the day, Sunday.

Mr. and Mrs. M. M. Schnurr and children were in Milwaukee for the week-end.

Mrs. Ray Bufton and Mrs. L. Sherman attended an Aid Society meeting at the home of Mrs. Frank Toynton at Genoa City Friday afternoon.

Miss Dorothy Schooley, Janesville, was a Sunday afternoon guest of Mr. and Mrs. George Higgins. Miss Schooley leaves this week to spend the summer months in California.

There will be English services at 9:30 and German at 10:45 at the Peace Lutheran church Sunday morning.

Miss Ruth Thomas of the English Department of the U. F. H. school left Monday for her home at West Salem, Wis.

Mrs. Etta Winn and sons have moved from the Shottliff flat to the John Frank home.

Mr. and Mrs. John Sutcliffe attended O. E. S. chapter at Richmond on Monday evening.

Mr. and Mrs. Ray Bufton are to entertain the M. E. Ladies' Aid at the annual party at the George Hyde farm home on Thursday or Friday of next week, June 24 or 25.

Gertrude Nett had a fortunate escape from serious injury while driving on route 12 near Crystal Lake. Another car came through a stop sign without stopping and rammed broadside into her car. Miss Nett's car was completely demolished but she was injured only slightly.

Rev. J. Finan attended Confirmation exercises at Elkhorn, Monday evening.

Mr. and Mrs. Oliver Mathews, Antioch, called on Mr. and Mrs. Paul Ganzlin, Thursday. Sunday the Ganzlins spent at Trevor with Mr. and Mrs. Wm. Boersma.

Mr. and Mrs. Ivan Newell were at Baraboo on Thursday to attend funeral services for Mrs. Newell's

mother, Mrs. E. A. Webster.

At Madison, Monday, June 7, occurred the marriage of Miss Helen Schmidt, daughter of Mr. and Mrs. Otto Schmidt of that city, and Dean Loftus, Detroit, Mich., son of Mr. and Mrs. Guy Loftus, Wilmot. The Rev. D. H. Bartholemey read the service at ten o'clock in the parsonage of the Blessed Sacrament church.

Miss Dorothy Schmidt, a sister of the bride, of Madison, was bridesmaid, and Frederick Braun acted as best man.

A luncheon for the immediate members of the families was held at Mrs. Gifford's tea room and in the afternoon there was a reception at the Schmidt residence. Afterwards the young couple left on a motor trip.

After June 16, the newlyweds will be at home to their friends in Detroit. Mr. Loftus was graduated in 1929 from the Union Free High School in Wilmot and in 1933 from the University of Wisconsin, where he was a member of Delta Sigma Pi and Beta Alpha Psi fraternities. He is employed as an accountant with the firm of Ernst and Ernst.

The former Miss Schmidt is a graduate of Central High School at Madison and took art courses at the University of Wisconsin.

32 Receive Diplomas

Thirty-two students received their diplomas at the 33rd annual commencement held at the Wilmot gymnasium for the Class of 1937 of the Union Free High school on Friday night. The procession was played by the High School orchestra, followed by a selection by the orchestra.

Robert Dean, class president, gave the address of welcome and introduced the first speaker of the five honor students, Robert Richter. Their joint topic was Educational Development in Our School, and Robert spoke on "Social Development."

Henry Johnson used Responsibility Development as his theme; Robert Scott, Physical Development; Arthur Nelson, Cultural Development and Gerald Runyard, Mental Development.

The High School chorus sang Sibelius' (Finlandia) "Dear Land of Home."

The address of the evening was made by Michael T. Peterson, of Williams Bay. His talk abounded with humor and he chose as his subject, Building. Stressing that the gradu-

ates' future must be based on planks of character, belief in God, citizenship responsibilities, and honesty. M. M. Schnurr, principal, gave a few appropriate remarks to the class before distributing diplomas. A reception held in the school building following the exercises by the Class of 1937.

Lion Fears Human Beings

The lion is not naturally aggressive. On the contrary he fears human beings instinctively. A lion's first thought is to escape when he comes in contact with man, according to a game hunter in London Answers Magazine. He only attacks when driven to it as a last resource in self-defense, or when a lioness is accompanied by cubs. Sometimes, too, a lion may become a man-eater through old age, toothlessness, and lack of game to kill. But contact with mankind is avoided by normal lions, unless, as sometimes happens, they are moved by curiosity.

Coil of Snakes

The rattlesnake is typical of the snakes that coil before striking. As soon as it is alarmed, it throws its body into a coil, with head raised a little above the rest of the body. When ready to spring, the muscles of the upper part of the snake are suddenly contracted, so as to straighten the body abruptly and thrust the head forward in a direct line. As the upper part of the body only is employed, the snake never strikes at a greater distance than one-third to one-half its length.

Test for Dog's Intelligence

Tests on the intelligence of dogs have revealed that the dog which turns its eyes in their sockets instead of merely turning the head is the most intelligent. The tests also disclosed that dogs have an inherent love for games, are very discriminating, have a sense of humor, and display every evidence of vanity.

Support for the Royal Family

Parliament provides for the upkeep of the royal family of Great Britain by voting a civil list. This includes annual payments to the king and queen and their children and other living members of the royal family.

HICKORY

Wilson King is getting along nicely from his recent operation at the Kenosha hospital.

Mrs. Alva Scoville and son, Clare, of Kenosha, also Mr. and Mrs. Gay Lange and baby of Hebron were Sunday afternoon callers at the Tillotson and King homes.

Mr. and Mrs. L. J. Slocum and son, Howard, of Harvard, called at the W. D. Thompson home Friday morning, on their way to Waukegan to visit their daughter, Mrs. Roy Olson, who recently underwent an operation.

Mr. and Mrs. O. L. Hollenbeck attended the wedding of their niece, Miss Ione Edwards, to Donald Crawford, in Waukegan, Saturday evening. Mr. and Mrs. John Stevens and son, Lloyd, drove to Big Rock, Ill., and spent the day with friends, Sunday.

Ward Wilton underwent an emergency operation for appendicitis at the Victory memorial hospital in Waukegan, Friday evening.

Miss Dorothy Hunter of River Forest was home over the week-end.

Mr. and Mrs. Hollis Hollenbeck and daughter, Marie, of Kenosha, called on the O. L. Hollenbeck family Sunday afternoon.

Russell Hunter drove to Oak Park, Friday afternoon and visited his sisters, Lois and Dorothy.

Miss Shirley Mae Hollenbeck of Norwood Park is visiting her grandparents here this week.

The Misses Lorraine and Loretta Herver visited relatives in Waukegan the first of this week.

Mr. and Mrs. Arthur Shearer, Mrs. J. Stokes and Miss Tessie Biemolt of Oak Park and Chicago, called at the Thompson and Tillotson homes, Saturday afternoon.

Mr. and Mrs. Hugo Gussarson and Ralph and Ruth visited the Olsen family in Algonquin Sunday.

Mr. and Mrs. Walter Madsen and family were Sunday dinner guests of friends in Deerfield.

John Stevens attended the funeral of an uncle in Waukesha, Wis., Tuesday of this week.

The two Kamela boys of Chicago are visiting their aunt, Mrs. Clarence Spiering.

Historic Spot on Campus

Among historic spots on the campus of the United States Naval Academy is the Maryland state capitol, the fifth place (1783-84) to be used by the Continental Congress for sessions.

Spices From the Tropics
Pepper grows in clusters of small round berries on a vine that is widely cultivated in the Netherlands East Indies as well as in India and other parts of Asia. The berries are picked before they are fully ripe and laid in the sun to dry. They become dark and black looking, as seen in cans of whole peppers. White pepper, which is popular for salads and other light foods where specks might be objectionable, is made from the same berry after the outside dark skin has been rubbed off. It is much milder than black pepper, because the chief flavoring oils are more predominant in the outer coating than in the inner berry.

Higher Than Niagara

Big Manitou falls on the Black river of Northern Wisconsin, called the Falls of the Great Spirit by Indians, is higher than the Canadian falls at Niagara.

"Eye" of a Storm

The "eye" of a storm is the calm area in the center of very high winds.

Curls on Head of Buddha
The Great Buddha at Kamakura, Japan, wears 830 curls upon its majestic head; these curls, according to legend, represent snails which once crawled upon the original deity to shelter his bald head from the sun.

Leopards Love to Fight
Leopards are the slyest and most ferocious of the big cats, but they are too light of weight to be a serious threat to their cousins, the lions and tigers. Their one great quality is a love of fighting.

Beetle Has Headlights
In the West Indies and Central America there is a large click beetle which has on the forepart of its body two large luminous spots giving out so brilliant a light that it is called in some places the "automobile bug."

Belief About Insects
Many keen students of insects maintain that if insects did not destroy each other in their constant struggle for existence, the human race would exist only a few years.

ANTIOCH and Vicinity

Eileen Osmond Is
Bride of V. A. Lewin

A pretty wedding of the week-end was that of Miss Eileen Osmond, daughter of Mr. and Mrs. Lester Osmond, 950 Hillside Ave., and Virgil A. Lewin, son of Mrs. Anna Lewin of Wadsworth, at St. Peter's church Saturday morning at 10 o'clock. The Rev. Father Flaherty performed the ceremony.

Miss Osmond wore the traditional white lace fashioned on princess lines with a long tulle veil. In her arms she carried white roses and lilies of the valley. She was given in marriage by her father.

Miss Lillian Vykuta as maid of honor, wore a gown of peach chiffon and carried a bouquet of roses.

Misses Mary Osmond, Hazel Hawkins, Geraldine Biester and Ruth Crenin, bridesmaids, were dressed in pastel shades of organza, wore matching turbans and carried roses.

Merrill Lewin was his brother's best man and Ernest Leable, Ray Flood, Morris Bonn and Don Adams were ushers.

Miss Grace Jyrch played "Lohengrin" wedding march and Miss Jyrch and Miss Olivette Pogas sang a duet during the Mass.

A reception for 50 guests was held at the home of the bride's parents after the ceremony. White roses and bouquets of garden flowers decorated the house.

Among the out of town guests in attendance were Mrs. George Yopp of Burlington, Mrs. Anna Strang of Wadsworth, Harry Kurth and daughter of Chicago, Earl Strang of Waukegan, Mr. and Mrs. Ralph James and Mrs. Louise Gilbert of Chicago.

Mr. Lewin and his bride spent their honeymoon in the southern part of Canada. They are now at home on Spafford street. Mrs. Lewin was graduated from the A. T. H. S. and is also a graduate from State Teacher's College at Dekalb. For the past two years she was a teacher at Hickory school. Mr. Lewin is a graduate of Warren High school.

MRS. HARVEY CELEBRATES
BIRTHDAY WITH PARTY

Mrs. Henry Harvey was pleasantly surprised Tuesday evening, when a number of friends gave her a party at her home at Little Silver Lake, the occasion being her birthday anniversary. Bridge was played and prizes were awarded to Mrs. Simon Simonson and Mrs. Evan Kaye. The group presented Mrs. Harvey with a lovely gift.

REBEKAH LODGE ANNOUNCES
CARD PARTY FOR JUNE 23

Lakeside Rebekah Lodge members are giving a public card party Wednesday evening, June 23rd, at the hall known as the Danish Hall. Price 25 cents. Everybody welcome.

LAKE VILLA WOMEN TO BE
GUESTS AT AID MEETING

Members of the Lake Villa church aid society will be guests of the Antioch Methodist aid society here next Wednesday at the home of Mrs. H. H. Perry on Lake Street.

ST. IGNATIUS GUILD TO
SPONSOR CARD PARTY

The ladies of St. Ignatius' Guild will hold a public card party at the home of Mrs. Mollie Somerville at 931 Main street, Wednesday, June 23, at 2 p. m. Price 35c. Prizes and refreshments. Everyone welcome.

MRS. HUNT HOSTESS
TO BRIDGE CLUB

Mrs. Thomas F. Hunt entertained the members of her bridge club at her home on south Main street Tuesday evening. Prizes were awarded to Mrs. Clarence Shultis and Mrs. Hunt.

ALTAR GROUP SPONSOR
CARD PARTY THURSDAY

The Altar and Rosary Society of St. Peter's church has announced a card party to be given at the church hall next Thursday night, June 24, at eight o'clock. The admission price is 35c.

Rayburn McNeal of Bloomington, Illinois, and Harold Nelson of Chicago spent the week-end in Antioch.

Ray and Winnie King have returned from Tucson, Arizona, where they have spent the past nine months with their parents, Mr. and Mrs. F. R. King. Ray has just completed his sophomore year at the University of Arizona, and Winnie was graduated from the Tucson high school this year.

Mrs. E. Elmer Brook, accompanied by Miss Lillian Vykuta, left Monday for Pennsylvania and Washington, D. C., where they will visit relatives and friends for two weeks.

On Thursday of last week, the Rev. and Mrs. J. E. Charles attended the Commencement Exercises in Saint Mary's Chapel, Kemper Hall, Kenosha, Wisconsin. Miss Bojan Constance Hamlin, daughter of Mr. and Mrs. Frank M. Hamlin, of Lake Villa, was a member of the graduating class.

Bojan received many congratulatory messages upon her achievement in attaining "Honors" standing. She expects to enter college in the fall.

Miss Dorothy Hunter of Lake Forest spent Sunday with relatives here.

CHRISTIAN SCIENCE CHURCHES

"God The Preserver of Man" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, June 13.
The Golden Text was, "In God is my salvation and my glory: the rock of my strength, and my refuge, is in God" (Psalms 62:7).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Preserve me, O God: for in thee do I put my trust. The Lord is the portion of mine inheritance and of my cup: thou maintainest my lot. The lines are fallen unto me in pleasant places; yea, I have a goodly heritage" (Psalms 10:1, 5, 6).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "There is today danger of repeating the offense of the Jews by limiting the Holy One of Israel and asking: 'Can God furnish a table in the wilderness? What cannot God do?' (p. 135).

Methodist Episcopal Church

Rev. L. V. Sittler
Antioch, Illinois

7:30 A. M. Holy Communion.
10:00 A. M. Church School.
11:00 A. M. Morning Prayer and Sermon.
Summer visitors, and others, are cordially invited to all our services.

Mrs. H. F. Beebe spent Wednesday in Kenosha.

Mr. and Mrs. J. S. Reesman, who have spent the winter in Foley, Alabama, are now at East Shore Lodge, Grass Lake.

Mr. and Mrs. Wm. J. Meyer of Grass Lake attended the 53rd annual commencement of Rockford Senior High school at the Coronado theatre in that city yesterday. There were 631 graduates, including Mrs. Meyer's cousin, Elsie Johnson.

Betty Lou Williams, Clarice Minto, Marguerite Doolittle and Janice Kapke, delegates from the Girls' Athletic Association of Antioch Township High school, are spending this week at camp at Lake Geneva, Wisconsin.

Mrs. Mollie Somerville spent Saturday and Sunday in Chicago, the guest of Mr. and Mrs. Earl Somerville.

Mr. and Mrs. N. Mattax and daughter and husband, Mr. and Mrs. H. Thompson of Pensacola Avenue, Chicago, spent the past month in their house trailer at Hillside Barbecue, east of Grayslake.

Mr. and Mrs. George Havens of Chicago spent Friday with Mr. and Mrs. H. Long.

Mr. and Mrs. Jesse Heald of Byron, Illinois, spent the week-end with Dr. and Mrs. H. F. Beebe, at their home at 543 Lake street.

Mrs. Vera Rentner, Mrs. Nels Nelson, Mrs. F. B. Swanson, Dr. and Mrs. D. N. Deering, Mr. and Mrs. Myrus Nelson, Mr. and Mrs. J. Ernest Brook and son, Billie, Mr. and Mrs. Henry Rentner, Mr. and Mrs. S. Boyer Nelson and Mrs. Sine Laursen attended the chicken dinner at the Lutheran Parish Hall, Wilmet, Wednesday evening.

Mr. and Mrs. John Murray entertained as house guests during the month of June Mrs. C. Hutton and George McCartney of Winnipeg and Mrs. D. Peterson and daughter, Mrs. Abbie Walker of Washington, D. C.

Harold Nelson of Chicago, Rayburn McNeal of Bloomington and Harry and Wendell Nelson left Wednesday morning for a fishing trip in Northern Wisconsin.

Personals

Mr. and Mrs. Ed Willets and sons Lawrence and Arthur, spent Monday in Milwaukee.

Harold and Robert Gaston spent the week-end at Ottawa with their cousin, Donald Gaston.

C. H. Zeigler returned home Sunday from four weeks trip through Michigan and Indiana.

Among the Chicago visitors on Tuesday were Mrs. Maud Sabin and Mrs. George Anzinger.

George Wagner, Sr., has been in the Kenosha hospital the past week for observation.

Mrs. Joseph Smith, Mrs. Jessie Allen and Mrs. Charles Oetting and son, Lewis, of Trevor spent Tuesday in Antioch.

Russell Hunter spent the week-end in Oak Park with his sisters, Lois and Dorothy.

Mrs. Oliver Mathews was the guest of Mr. and Mrs. Paul Ganzlin, at Trevor Tuesday.

Dr. William R. Whitney and son, Walker, of Evanston spent the week-end with Mr. and Mrs. William J. Meyer at Grass Lake.

Mrs. Hugh Galbraith and daughter, Sandra Jean, of Waukegan is spending this week with her parents, Mr. and Mrs. James Stearns.

Mrs. Sidney Kaiser who underwent an operation for appendicitis at the Michael Reese hospital, Chicago, two weeks ago, returned home Monday.

Mrs. Alfred Dahl and son, Johnnie, of Trevor were Antioch shoppers on Tuesday.

Mr. and Mrs. Charles W. Anderson opened their summer home at Petite Lake Decoration Day week-end.

Guests entertained were Dr. and Mrs. Ray M. Hutchinson, Eleanor and Billy, Mr. and Mrs. Scott Peterson and daughter, Lois, Mr. and Mrs. Edward Hansen and sons, Edwin, Jr., and Robert.

POULTRY

WATCH WEIGHT OF
PULLETS FIRST YEARFrequent Checks Should Be
Made of Progress.

By C. O. Dossin, Poultry Department, Pennsylvania State College—W. S. Service.
Pullets should gain in weight during the first laying year. Some poultrymen make a practice of marking a few pullets and then weighing these same birds every week or two through the fall months to keep a check on the birds' weight. Others just catch a few of the birds occasionally and handle them for weight and amount of flesh on the breastbone.

If one has occasion to go into the hen house at night after the birds are on the perches, that is also a good time to check on the birds' weight and condition. Another good time to note the amount of flesh on the breast is while removing the eggs from underneath the pullets in the nests.

If the pullets lose weight, there is a good possibility of their going into a molt. To maintain body weight or to increase it, feed more to the birds.

Give all the scratch feed the birds will eat at night and about one-half that amount in the morning. Keep dry mash before the birds at all times. Filling the feeders with fresh mash each day will encourage greater mash intake than when the feeders are filled once or twice a week. Stirring up the mash in the feeders occasionally also helps.

The use of lights in the hen house to lengthen the working day of the birds will increase feed intake. A 13 or 14-hour day will meet the requirements of the average flock.

Two Principal Methods
of Finishing Poultry

There are two principal methods of finishing poultry—pen-feeding and crate feeding. The former method is generally used for turkeys and waterfowl, the latter for chickens of all ages. Some feeders follow the practice of pen feeding for a couple of weeks and then "finish off" in crates. Batteries are commonly used in intensive plants, but for ordinary farm use crates are equally satisfactory and are inexpensive. The quarters where the birds are to be "finished" should be dry, cool and well ventilated, and the birds should have quiet and freedom from excitement.

The general purpose or heavyweight breeds are best suited for crate feeding and best results can be expected only where strong, vigorous, sturdy type birds are used. Before starting the finishing period, the birds should be dusted with flowers of sulphur or some other suitable preparation to insure their freedom from lice.

China's Coastline

China has a 4,000-mile coastline, borders some 6,000 miles on Soviet Russia and about 4,800 miles on British possessions.

July Jamboree to Bring
Thousands to Burlington

The first annual convention of the Burlington Liars Club and the Home Coming which are two big features of the Burlington four-day July Jamboree is expected to bring thousands of visitors to the lake section of South-eastern Wisconsin. Several thousand invitations are being sent to the members of the Liars Club in the Mid-Western states. This event will be staged on Sunday. Last year's Champion Liar will be there. A liar's contest will be held on the grounds. News reel outfits, lie detectors, etc., will be present.

This big event opens with a Water Fight between Lake Geneva and Burlington Fire Departments on Friday night. A monstrous three-section street parade will be held Monday morning, July 5. The Delavan Drum and Bugle Corps will lead one section, Elkhorn School Band another section, and the Burlington School Band the third section. A Doll Buggy Parade will be held Monday afternoon.

A carnival of amusements, free attractions, games, rides, etc., will supply plenty of entertainment. The celebration closes Monday night and an Oldsmobile gift car will be given away, as well as cash prizes each day.

Geese Are Profitable

Abundant pasture of a sort that is tender and remains green for a long period is the most economical basis for the raising of geese. A stream or pond, or even tanks of water may serve for the aquatic needs of the birds and shelter may be reduced to a minimum. In the South none is required and in the North a simple shed open to the south is sufficient. Geese can be raised successfully and profitably in all parts of the United States, but are more abundant in the Middle West.

Feeding for Production

Many poultrymen are getting higher production by feeding only a small amount of grain in the morning and the remainder at night. The morning grain is fed in a clean litter from 4 to 6 inches deep and consists of about one pound of grain for each 100 hens. The afternoon feeding is put in troughs. The practice of feeding grain at different intervals of the day, especially during the winter months, increases the activity of the birds and overcomes idleness.

Beetle Has Headlights

In the West Indies and Central America there is a large click beetle which has on the forepart of its body two large luminous spots giving out so brilliant a light that it is called in some places the "automobile bug."

Money to Loan

I have clients who have money to lend on first mortgages on real estate and others who want to borrow money on real estate. If interested either way, I will be glad to talk it over with you.

Roman Floors Good
Near Holy Bones street in Leicester, England, the cellars of some of the houses have mosaic floors dating from Roman times, while at Aldborough, Yorkshire, a Roman mosaic pavement can be seen in the floor of a local resort.

So Uncle Eben Says
"A man dat don't think of nobody but hisself," said Uncle Eben, "is at least sure dat he will never be entirely friendless."

Common Form of Insanity
One of the most common forms of insanity is dementia praecox. Known also as schizophrenia, it frequently occurs late in adolescence or early in adult life. Its varying symptoms, says a writer in Pathfinder Magazine, include disintegration of personality, loss of interest in people, inability to take part in social or business affairs, incoherence of thought, silly or depressed behavior, mental delusions, and periods of deep stupor.

LAKE VILLA

The John Walker home was the scene of a very happy reunion of the Boehm family last Sunday, and more than forty of the family renewed acquaintance. Among them were Mr. and Mrs. Spiegel, Mr. and Mrs. Clement Johnson and children, Mr. and Mrs. Dahlberg, Mr. and Mrs. Sam Patis, all of Chicago, Mr. and Mrs. Wilson of Northbrook, Mr. and Mrs. Louis Koeppen and sons, Mrs. M. Boehm of Wauconda, the Christofferson family of Waukegan, Mr. and Mrs. Fritz Boehm of Mundelein, Mr. and Mrs. Al Boehm of Lake Villa. The group enjoyed a dinner together and spent a very pleasant day reminiscing.

Mr. and Mrs. William Walker entertained several relatives from Chicago at their home east of town on Sunday.

Mr. and Mrs. Clarence Miller and small daughter of Chicago spent Sunday at the Carl Miller home.

Mr. and Mrs. Carl Miller drove to southern Michigan early this week and Junior Miller who has been visiting there, returned home.

Mr. and Mrs. James Leonard, Jr., and children of Chicago visited at the James Leonard, Sr., home on Sunday afternoon.

The Royal Neighbor Officers' Club met last Wednesday afternoon with Mrs. Andrew Wolff at her home at Sand Lake, and several visitors were present to enjoy the social afternoon of cards.

Kathleen Gindich was hostess for several of her young friends at a party at her home last Wednesday afternoon to celebrate her seventh birthday.

Mrs. Mary Kapple visited relatives at Grayslake from Wednesday until Sunday night last week.

The Royal Neighbors of Cedar Lake Camp will hold their next regular meeting on Tuesday, June 23rd, instead of June 30th, the regular time, and members are asked to note the change of date.

Mr. and Mrs. Raymond Sherwood who spend the greater part of the year in Florida, are at the Clare Sherwood home to spend the summer months.

Mrs. Stella Pedersen visited her sisters in Chicago on Tuesday and Wednesday and also attended the graduation services of her niece at Longwood Academy and her nephew's graduation from Notre Dame University at South Bend, Indiana.

Rev. E. T. DeSels and family took their final load of household goods to their new home in Milwaukee on Tuesday morning. We hope they will be very happy in their new home. Rev. DeSels gave a short farewell sermon Sunday at the close of the Children's Day services, and following that, also preached at Allendale school. The Ladies' Aid Society held a farewell party for Mrs. DeSels and presented her with a pull-up chair for use in her new home. It was a complete surprise for her, but she responded in her usual charming manner and a very pleasant afternoon was finished by having a group picture taken.

Mrs. Edna Koelstra, her daughter, Dorothy, also another daughter, Mrs. Oilschlager and husband, and her son, Louis Koelstra and wife, all of Wisconsin Rapids, were guests of Mr. and Mrs. Herman Wolff over the week-end, and returned to their home Sunday, except Miss Dorothy who remained for a visit with her sister. On Saturday night a party was held in the village hall in honor of Mrs. Edna Koelstra, and guests were present from Grayslake, Waukegan, Hebron and Kenosha, as well as many from Lake Villa.

Mrs. Belle Kellogg of Los Angeles, California, came Tuesday to spend some time with her aunt, Miss Mary Kerr, and her brother, J. K. Cribb and other relatives.

Mr. Gleason, who fell from a tree while trimming it some time ago, is being treated at the Waukegan clinic and he will be unable to work for some time.

We are glad to be able to report that John Philippi is gaining faster than formerly.

Miss Jean Culver is home from Beloit college for her summer vacation.

Mrs. Swanson and Miss Elsie drove to southern Michigan on Tuesday to visit friends for a couple of days before beginning her summer work as beauty operator in Chicago.

Mrs. Paul Avery is a patient in St. Therese hospital recovering from an operation performed Monday and is doing quite well.

Mrs. Erwin Barnstable, another surgical patient at St. Therese hospital, is recovering slowly. Only members of her family are allowed to visit her.

Mrs. McLaren has sold her interest in the "Cozy Inn" in Grayslake road to Mrs. Anna Jackson who lives next door.

Mr. and Mrs. George Barth and daughter of Chicago spent Saturday and Sunday with Mrs. Barth's mother, Mrs. McLaren.

Mr. and Mrs. Fred Bartlett entertained several friends from Waukegan at their home Saturday evening.

A petition for water system is being circulated and even though this has been defeated once, it is hoped that it may go through now, for it is a much needed improvement.

Mr. and Mrs. McCloskey have returned to their home here after having spent several weeks with their daughter in Chicago.

Largest Man-Made Lake

The world's largest man-made lake is Lake Mead, the reservoir above Boulder dam. It lies in the desert land in Arizona and Nevada.

THERE WERE NINE DIFFERENT UNITED STATES PENNIES COINED IN THE YEAR 1909!

Bedbugs are really very nice things to have around, if you do not happen to be rather vain. They eat food particles, wool-dust and other contributors to the general untidiness of the house. It was in 1909 that the Indian-head penny went out and the Lincoln-head penny came in. The great number of coins was because of difference in incidental markings.

Rumsey, the Great Inventor

James Rumsey, soldier and mechanic, who made steam propel a boat 150 years ago, was born on Bohemia Manor, near Warwick, Md., in March, 1743. A century and a half ago, on December 3, 1787, he publicly demonstrated a workable steamboat on the Potomac river at Shepherdstown, W. Va. Robert Fulton, who is credited with making the steamboat a commercial success, submitted his first plans a year after Rumsey's death on December 21, 1792. At that time, both Rumsey and Fulton were in London and apparently were intimate friends. Rumsey had gone to England to perfect his invention but died of apoplexy on the eve of the demonstration of his largest boat, the Columbian Maid.

The Belgian Congo

Although politically the Belgian Congo is a dependency of Belgium, it is really just the opposite. Eighty times larger than Belgium, it supplies the mother country with all its coffee, gold, copper, tin, diamonds. It is one of the world's few sources of pitchblende from which comes radium. In the heart of "darkest Africa," Belgian Congo is far from dark.

When Wigs Meant Something

Wigs came into common use late in the Seventeenth century, and the possessor of a number of wigs was looked on as a man of affluence. Wigs were fashioned of horses' and cow's tails, goat's hair, thread and silk, and bore such names as "feather top," "full bottom," "fox tail."

No, a penny in the collection hardly counts as a down payment on a harp.

The only real friend you can buy is a dog.

POULTRY FACTS

WATCH STANDARDS OF COD LIVER OIL

Potency for Rats Does Not Apply to Chickens.

Supplied by the United States Department of Agriculture—WNU Service.

Any source of vitamin D that is to be included in mixed feeds intended for poultry should be purchased on the basis of its guaranteed potency for chickens instead of rats. The potency of commercial sources of vitamin D is customarily measured by tests made with rats which do not react to the different sources of this vitamin as do chickens.

The poultryman may obtain vitamin D from cod-liver oil, sardine oil, other fish-liver and fish oils, and irradiated products. In the case of cod-liver oil, new standards have been adopted, and if it is to be sold as such it must now contain at least 85 international vitamin D units and at least 600 international vitamin A units per gallon. Any cod-liver oil that does not meet these requirements must be labeled "cod-liver oil, not U. S. P." The designation "Poultry U. S. P." has been used recently, but it is misleading and its use is not official.

Until some satisfactory chicken unit of vitamin D potency has been established, cod-liver oil may be purchased on the basis of the number of international vitamin D units it contains per gram. All other sources of vitamin D should be purchased on the basis of the minimum quantity, expressed as per cent of the feed, required to protect young growing chicks against rickets.

"Although the official method of stating vitamin D potency is to give the number of international units per gram, some carriers of cod-liver oil are still marked with the number of units per ounce, and often the unit meant is not the international unit. The purchaser should remember that all units of vitamin D potency are not equal and that an ounce is more than 28 times as heavy as a gram."

Sour Skim Milk Good Beverage for Chicks

Sour skim milk is an excellent beverage for baby chicks, according to Dr. W. C. Thompson, professor of poultry husbandry at the New Jersey College of Agriculture, Rutgers university. It increases their appetites and is a readily digestible and highly nutritious food in itself, he says.

The rate of growth is stimulated by feeding sour skim milk to chicks during the first six weeks, and the beverage also acts as a regulator of the birds' digestive systems, Doctor Thompson points out. Commercial poultrymen are using this food in increasing quantity lately because it helps to produce good broilers quickly and aids in getting young pullets properly started.

Fresh milk may easily be made sour by using a small amount of sour milk as a starter and adding fresh milk to it each morning. If this is set in a warm room, the souring process will take place rapidly.

Feed the sour milk in a thickened condition, but first break the clabber by stirring so that the whey as well as the solids will be consumed. Baby chicks may be started on sour milk during their first day in the brooder and need be fed no water during the entire six weeks, provided there is plenty of the milk on hand. This forces all the chicks to get the sour milk consuming habit.

When feeding sour milk to chicks, it is advisable to use earthenware or enamelware containers instead of metal receptacles, as the lactic acid in the sour milk may have a chemical reaction on the metal.

Poultry Cullings

If the turkey is to be dry picked, the work should be begun immediately while the feathers are loosened.

It costs approximately 80 eggs a year to feed a hen, whether it is a good layer or a poor one.

Farm flock records show that those who brood early chicks make more profit from their flocks than those who brood late chicks.

Lighting will help to hasten the moult of old birds, and get them back into laying condition quickly.

Shatterings of alfalfa (largely leaves and the finest stems) that accumulate under hay drops and in front of the mangers, are excellent feed.

See that the birds get plenty of sunshine, and do not keep breeders in service too long. The older the birds, after the first year or two, the lower is the quality and fertility of their eggs.

Geese represent about one-half of one per cent of all poultry raised in this country, reports Oklahoma A. and M. college.

Considerable loss in breakage of eggs in shipment can be avoided if attention is given to the production of eggs with strong shells.

New Hampshire Reds have made a very enviable reputation for themselves. It is hardly believable when you hear of the marvelous results many poultry raisers have had.

FARM TOPICS

SHOULD TURN EGGS WHILE INCUBATING

Poultry Expert Cites Four Fundamental Factors.

By Dr. W. C. Thompson, Poultry Husbandman, New Jersey Experiment Station, WNU Service.

Temperature, ventilation, moisture and change of position are the four fundamental factors in obtaining good hatches in incubators.

Changing the position of the embryos during the three weeks of development within the shell is very important. Mother hens, incubating their setting of eggs on the old-fashioned nest, usually move the eggs beneath them at least twice during the day, thus tending to equalize the exposure of each egg to the conditions of temperature, fresh air and moisture, all of which must be uniformly applied to each egg.

In the operation of the modern incubator, man can well copy this rule of the hen. Experimental evidence seems to indicate that he can go the hen one better by doubling the number of turnings during each 24-hour period.

If hatching eggs are changed in position once every six hours, optimum results, other things being equal, will generally result. It is partly a matter of preventing the sticking of the developing embryo to some one position within the shell, and partly a matter of equalizing the exposure of the respective eggs to the conditions which will bring about normal, natural embryonic growth.

Most modern incubators are provided with devices for turning eggs. It is important to be regular and consistent in this practice. It is one of those many small items which, taken collectively, spell successful hatching and the production of chicks.

Warm Soil Is Necessary to Grow the Sweet Corn

With jaded winter appetites hungering for such spring dishes as roastin' ears, home and commercial vegetable gardeners are advised that no definite date can be given for the safe planting of sweet corn, since the seed will not germinate or grow until the soil is fairly warm, according to B. L. Weaver, of the department of horticulture, University of Illinois, college of agriculture.

Planting a number of varieties which vary as to time of maturity is a recommended method of obtaining a succession of roasting ears throughout the season. A good succession of white corn may be had by planting Howling Mob, Early Evergreen, Stowell's Evergreen, Narrow Grain Evergreen or Country Gentleman at the same time. A succession of yellow varieties may be obtained by using Purdue Bantam, Golden Bantam, (Bancross), Golden Cross Bantam and Yellow or Golden Evergreen.

Yield and uniformity are much greater where hybrid seed is used. Hybrids, because of their vigor and possibly because of some inherent resistance, may be less susceptible to bacterial wilt than open-pollinated types.

Selecting New Flock

Poultrymen who are selecting their new breeding flock, if they are planning on raising their own baby chicks this spring, says D. D. Moyer, of the Missouri station, should retain only those hens which are healthy. Hens which have laid well certainly should be included. Satisfactory future breeders are also indicated by thoroughly bleached skin in the case of yellow skinned breeds, and an old, dry coat of feathers, a sign of late molting. Pullets to be used should have large, rugged bodies, well covered with muscle and fat.

They should show early sexual maturity by well developed comb and wattles, and a large, pliable abdomen with flexible pin bones that are spread apart. A healthy flock should be the aim of all poultrymen.

Higher Farming Costs

Labor and products bought by the farm in 1937 are predicted by the Department of Agriculture to cause a sharp increase in the cost of farming. Price for feed for live stock and seed will stay high until the crop of the 1937 season replenishes the present drought-reduced supply. Farm machinery, fertilizer, and building supplies are expected to advance some in price due mostly to the increased cost of labor and material.

Keep Brood Sows Gaining

Brood sows should be kept gaining at the rate of about one pound per day up to farrowing time. Difficulty in farrowing, pig eating and poor milk flow are often traceable in inadequate rations, states a writer in Wallaces' Farmer. A good ration includes about a pound of oats per sow daily, a small amount of protein supplement such as tankage or soy bean meal, free access to legume hay and enough corn to put on the desired gain.

Hints for Homemakers

By Jane Rogers

SELF-STARTING electric clocks regulated by alternating home current have a definite appeal to the modern woman. These clocks are not only punctilious time keepers but they come in such a variety of colors and styles as to make it possible to choose a clock that will harmonize with the decorative scheme of any room in the house.

Beautifully tinted glass clocks and charming timepieces in wood and plastic play an important role in room design. The Telechron-motored clock illustrated, for example, has been especially designed to appeal to the feminine whim. It is styled of glass with mirror finish. Imitation "Cloisonne" finish on metal makes the dial which is encircled with black etched-in Roman numerals. In blue, amber or clear crystal this particular clock makes a charming timepiece for the boudoir or feminine sitting room.

Did you know that by selecting window shades in a continuance of color tone in which a room is decorated the room achieves a feeling of greater spaciousness? Larkspur blue shades—and incidentally Larkspur blue is one of the newest and smartest colors to make its appearance in cloth window shades—have been chosen to create just this effect in a room papered in pale blue where the woodwork is painted in a contrasting darker blue.

This new Larkspur blue window shade has been used with great effectiveness in bathrooms and bedrooms. The color is a particularly good one for bedrooms as it keeps out the glare of the summer sun and makes for cool restful sleeping.

Beauty Hints

By Jane Heath

IT'S going to be a gay and giddy summer with everyone of us wearing brilliant colors, vivid stripes and prints. If we aren't careful all this brilliance will overshadow our features, so that we will be known for our costume and not for our faces.

Don't despair, there is always a way to overcome most things. In this particular case you'll have to highlight your features as you've never done before.

Your eyes will have to shine like stars, your eyelashes will have to be long and gloriously curled upwards. That is where that handy little eyelash curler comes in! It takes only 30 seconds and the effect is amazing!

To make your eyelashes and your brows luxurious and silky, use Kurlene and put it on every single night before you go to bed. Use it on those days when you go mascara-less—it gives your eyelids that youthful shiny look.

As for eyeshadow, you'll find yourself using it in the daytime as you never did before. The colors will be fascinating blues, from aqua to royal. Greens will be of great importance too, particularly spring-green. You'll want to use silver or gold for evening glamour. Be sure to paint it on with an eye-beauty brush so you achieve a smooth, lovely line. Don't smear on Shadette with your finger.

Don't forget to keep your eyebrows trim and neat, the easiest way to do it is to use wiskers.

Lash tint mascara that is flake-proof and water-proof, you'll find a delight for warm weather use and for swimming. It will keep your eyes glamorous at all times.

Settlers Protected Forests

The first settlers in America were wiser than many of their descendants, for they recognized the value of forests, passed laws to protect them. Special permission had to be gained to cut trees in Plymouth colony: William Penn demanded that one acre of forest remain untouched for every five cut.

Italians Play the Numbers

People are lottery minded everywhere and play the numbers by hunch and chance. In Italy, no pious person dreams of the Madonna without rushing out at once to play her numbers, 6, 8 and 15.

Two Worms for One

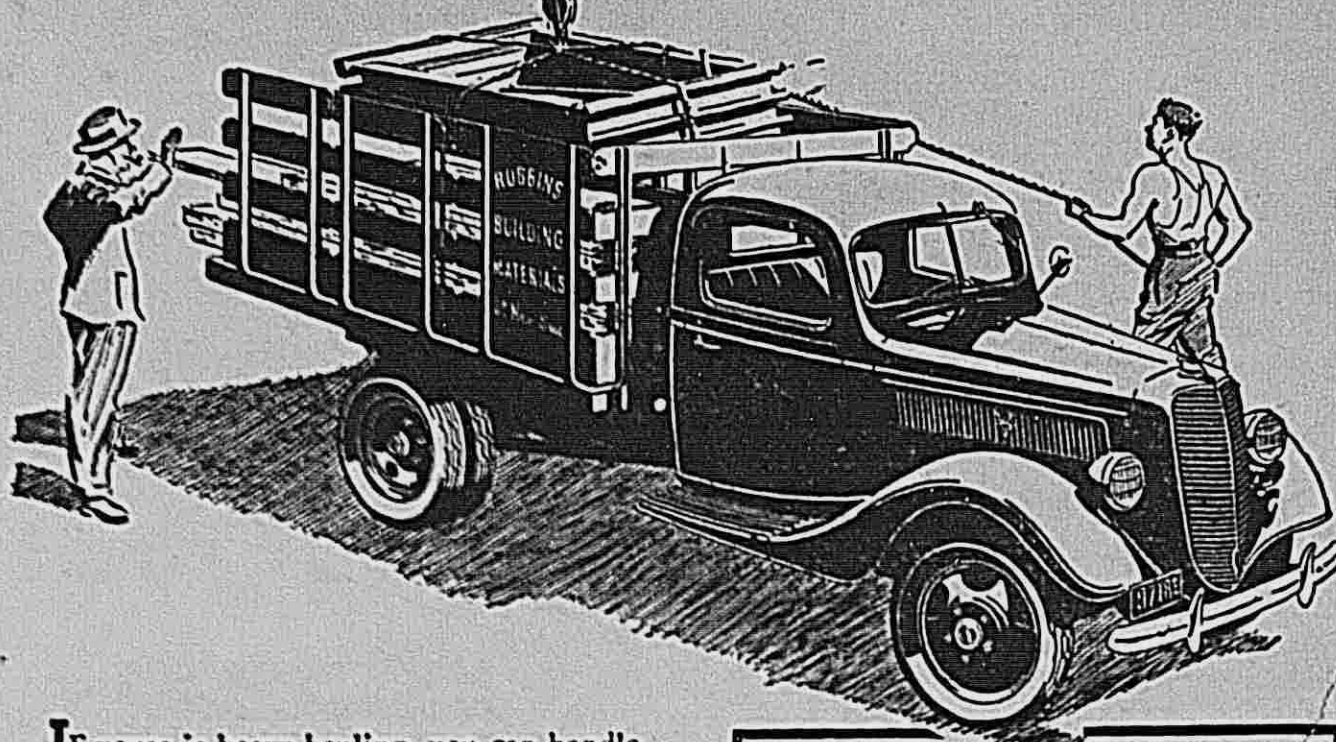

If a fish worm is cut in two, a new head or tail will grow on to each cut end, making two good worms.

Hums With Its Wings

The hummingbird hums with its wings.

FORD V-8 POWER

will do the job at lower costs than ever!

If yours is heavy hauling, you can handle it faster, easier, and at less cost with the improved 85 H. P. Ford V-8 engine.

For light jobs, the 60 H. P. Ford V-8 engine gives splendid performance—with many extra miles to the gallon of gasoline.

With either engine, you get an added economy available only to Ford V-8 owners—the Ford Engine Exchange Plan. You can replace an old engine with a factory-reconditioned one—at much less than the cost of an ordinary engine overhaul.

Let your Ford Dealer help you select the chassis, engine, and body best suited to your loads. Then, let an "on-the-job" test show you how much better—and at how much less cost—you can now do your hauling with modern V-8 power as Ford offers it.

FULL-FLOATING REAR AXLE—All the weight is carried by the axle housing.

QUICK-ACTION SAFETY BRAKES—Brake drums of cast alloy iron are practically score proof.

Always on tap! PLENTY OF HOT WATER

BUY AN AUTOMATIC GAS WATER HEATER FOR COMPLETE HOT WATER SERVICE

• Sticky, sultry days—days when father and the children want plenty of hot water to clean and refresh themselves after a full day of work and play. A gas hot water heater in your home will bring you constant hot water *instantly* for this and other domestic needs. Cleaning, scrubbing, washing—you can do them all—and you'll find there's oceans of hot water *always* with an automatic gas water heater.

What's more, it's completely automatic. There's no fuss or bother, no running up and down basement stairs to tend bothersome hand-operated water heaters. It's the complete Hot Water Service that gives you no worry. It's hot water that is always on hand for instant use.

Visit your Public Service store at once. Don't put off the hot water problem longer. Now is the time to buy an automatic gas water heater. Do it TODAY!

BE SURE TO SEE THE MANY ATTRACTIVE BARGAINS THAT YOUR DEALER AND NEIGHBORHOOD PLUMBER ARE OFFERING IN HOT WATER HEATERS, TOO

PUBLIC SERVICE COMPANY OF NORTHERN ILLINOIS

AS LITTLE AS \$1.50 DOWN for an automatic Gas Water Heater... It brings plenty of hot water *always*

1. Trade-in allowance on your old water heater or furnace coil.
2. Liberal allowance for plumbing installation.
3. 3 years to pay, balance monthly—small amounts.

BUY NOW AT THESE LIBERAL TERMS!

TREVOR

Charles Mahoney, Kenosha, made a business call in Trevor Tuesday.

Mrs. Albert Weinholz and Mrs. Louise Derler were Kenosha visitors Tuesday.

William Oetting and cousin, Riverside, Ill., called in Trevor Tuesday.

A number in Trevor and vicinity attended class night at the Wilnot gymnasium on Tuesday evening.

Mrs. Joseph Smith and Mrs. Jessie Allen accompanied Mrs. Charles Oetting and son, Lewis, to Antioch Tuesday.

Six Chicago motor coach busses brought out four hundred children from St. Jerome School, Chicago, for a day's outing at the Cermak grounds at Channel Lake on Wednesday.

Several from Trevor attended the Eastern Star meeting at Wilnot Wednesday evening.

Robert Patrick, Robert and James Manning, Salem, called on the Patrick families Wednesday.

Miss Elizabeth Corrin attended a picnic at Lake Geneva Thursday.

Pete Schumacher, Melrose Park, Ill., spent Saturday in Trevor.

Mrs. Louise Derler and Mrs. Lewis Pepper were Chicago visitors Thursday.

Mrs. Alfred Dahl and son Johnnie were Antioch callers Thursday.

Mr. and Mrs. Schweary and daughter, Betty, Chicago, spent over the week-end at their cottage.

Mrs. Louise Derler is visiting her sister at Traverse City, Michigan.

Mr. and Mrs. Joseph Jetecek and son, Joseph, Jr., Chicago, were visitors over the week-end with Mrs. Jetecek's parents, Mr. and Mrs. Otto Leithke.

Mrs. Jim Barnstable, daughter-in-law and children, Chetek, Wis., called on her brother, Daniel Longman and family.

Mr. and Mrs. George Oetting, son, Binky, and Herman Oetting, Jr., Riverside, Ill., were Saturday callers at the home of Charley Oetting.

Miss Pauline Copper and friend, Frank Harris, Chicago, spent Sunday with her mother, Mrs. Mattie Copper.

In the afternoon, Mrs. Copper and daughter, Gertrude, accompanied them to Janesville, Wis., where Gertrude remained to attend the school of the blind.

Ray Pregenzer, Grass Lake, was a Trevor caller Monday.

Mr. and Mrs. Paul Ganslin, Wilnot, were Sunday visitors at the William Boersma home.

George and Raymond Schumacher, Melrose Park, Ill., were Sunday visitors at the Russell Longman home.

Mrs. Ed Mutz is entertaining her father from Keokuk, Iowa.

William Bushing, near Bristol, was a Trevor caller Friday.

Mr. and Mrs. Richard Corrin and daughter, Elizabeth, were Milwaukee visitors Friday.

Mrs. Byron Patrick and son, Ray, Salem, called on the Patrick families Friday.

Mrs. Ann Kimmel is having her house wired.

Mrs. Daniel Longman has returned home after spending the past two weeks with her daughter, Mrs. Vernon Lindblad and family, Chetek, Wis.

Mr. and Mrs. Alec Bailey, their two daughters, a nephew, and Mrs. Cary, Mrs. Bailey's mother, of LaGrange, Ill., visited Mrs. Luanah Patrick and son, Milton, on Saturday.

Callers at the Patrick sisters' home on Sunday were Mr. and Mrs. Russell Jones, Mrs. Maude Robbins, Miss Frank Stewart, Kenosha; Hiram Patrick, daughter, Mrs. William Kruckman and son, James, Burlington; and Mrs. George Brown, Bristol.

Mrs. Richard Corrin, daughter, Elizabeth, Mrs. William Evans, daughter, Marguerite, Mrs. Nellie Runyard, and Miss Sarah Patrick attended the Osmond-Lewin wedding at the Antioch Catholic church Saturday morning.

Mr. and Mrs. George Hallett and mother, Mrs. Helen Hallett, Kenosha, were Friday evening callers at the Joseph Smith home.

Jake Kaltenberger and friend, Waukegan, were Trevor callers Sunday.

COSTS TO FARMERS
TAKE JUMP IN 1937Various Things Affect Expense
of Crop Raising.

Washington, D. C.—The cost to farmers in raising their 1937 crops probably will be "somewhat higher" than last year, according to the Department of Agriculture.

Farm labor will cost slightly more. Seed prices already have advanced sharply, and feed prices will be materially higher than in 1936, the department said.

Summarizing the outlook for farm labor, equipment and fertilizer, the department said:

"Wage rates will rise with the continued upward trend in the demand for workers in nonagricultural activities, and with the greater demand for hired farm workers that is likely to result from more nearly normal crop and livestock production."

"Prices paid by farmers for seed have already advanced sharply as a result of drought-restricted supplies and will continue at relatively high levels during the 1937 spring planting season."

"During the first half of the year, or until the harvest of the 1937 crop replenishes the present drought-reduced supplies, the feed prices will be materially higher than in 1936."

"Prices of other items used in production are expected to differ but little from the 1936 levels, although the prospective general upturn in the cost of materials and labor entering into the expense of manufacturing farm machinery, fertilizer and building supplies may result in slight advances."

The department said farm wage rates will continue the "slow rise of the last three years" due to an increase in both the nonagricultural and agricultural demand for labor. Farm wage rates are now the highest since 1931.

The department forecast that "production and sales of farm machinery during 1937 probably will exceed those of 1936—which were the highest since 1930—and equal the 1925-29 average, especially if crop conditions are more nearly normal."

Fertilizer sales and prices, it was said, probably will average "somewhat higher" than in 1936, but not greatly different from the 1910-1914 average. Use of fertilizer has increased steadily since 1929, it was said.

Shoeing of Oxen Problem for Pageant Officials

Marietta, O.—"Calling all ox-team drivers" is the cry of the United States Northwest Territory Celebration commission as it faces the question of how to shoe the oxen which will start December 3 to draw a covered-wagon caravan over the original trail from Ipswich, Mass., to Marietta, in a re-enactment of the pioneer journey to the north-west territory.

Commission officials explained their dilemma by pointing out that most of the old pioneer trail is paved road today, and oxen must be shod to be driven on these roads. While there are thousands of ox-teams available, most of them are on farms where shoeing is not a problem, and old-timers familiar with shoeing of oxen are becoming scarce.

It is known, of course, that the ox shoe is in two pieces and differs a good deal from the horseshoe. However, some say that the ox's hoof is too thin to stand re-shoeing, while others assert that although the white part of the hoof is thin and brittle, the black part is tough and will stand frequent re-shoeing.

Castle Shrine Is Urged for Dionne Quintuplets

Toronto, Ont.—A grandiose plan to enshrine the Dionne quintuplets in the \$2,000,000 Casa Loma "white elephant" castle and—as its sponsor said—"pay off the entire national debt in twenty years"—was under consideration by the Toronto civic property committee.

The children would be made "Canada's greatest tourist attraction" under the scheme of Alderman Percy Quinn, who was named a committee of one to place the plan before the property commissioner.

The plan would place the quintuplets amid the regal splendor of the castle, built by Sir Henry Pellatt, which Toronto seized for unpaid taxes. They would reside there eight months of the year.

It was claimed that the stream of visitors to their Callander nursery, now past the 1,000,000 mark, would be diverted to Toronto to pay 50 cents a head for admission to the castle grounds.

Punish Bad Grammar

Greenville, Pa.—The use of bad grammar by students at Thiel college has been made a punishable offense—punishable by a reduction in grades.

Navy Called Best Chewing Customer

Merida, Yucatan.—According to statistics kept by the chewing gum manufacturers, who buy their raw product here, the best world customer is the United States navy. It is figured that sailors chew more gum on the average than stenographers.

The University of Paris was founded by King Philip II, between the years 1140-1170. The exact date is unknown. It was a development of the Cathedral School of Notre Dame.

England's Rose Names

Rose names in England include three kings, thirteen queens, ten princes, nineteen princesses, eleven dukes, and seventeen duchesses.

The Chinese Language
in Picturesque Phrases

No language is more thickly interspersed with picturesque phrases and gaudy comparisons than the Chinese, writes John W. Mahoney in Nature Magazine. It is often and quite correctly said that one can never understand the people of Cathay without an insight into the language of the country, the common dialects of the working classes as well as the formal Mandarin spoken in official and well-to-do circles.

The spoken and written word in the Far East sprang from the primeval awe the early sages and philosophers, who first attempted to put their thoughts and desires into pictures or words, felt toward all things natural about them.

At a dinner of congratulation, when a young Chinese friend of mine received an appointment to an important government post, a state-ly old gentleman expressed his good wishes: "May you soar as the roc to a height of 10,000 li!" Chinese classics are filled with such quaint expressions, accessories of speech that are still used in the everyday language of the peasant-coolie as well as the merchant prince and the scholar.

Interwoven into all the traditions of the country, and into many of the customs, are relics of by-gone dynasties and ages when the worship of nature in the heavens, the seas and on land played a most important part in both the spiritual and the practical life of the Chinese. It is difficult to find treasured tapestries or early paintings that do not have about them some demonstration of this regard for the beauties of nature.

Meaning of Mutation

The change in the male voice occurring at the beginning of adolescence is called mutation. Shifting the position of the left hand in violin playing is also known as mutation.

Perfected Hydraulic Brakes . . . Greatest Pulling Power in Their Price Range . . . New Steelstream Styling

CHEVROLET
FOR ECONOMIC TRANSPORTATION

"Give us a truck with ample pulling power . . . one that is economical . . . one that will give reliable service over a long period for the least money."

That is the demand of all truck operators, and thousands of Chevrolet users will tell you that the best answer is—Chevrolet trucks!

Chevrolet trucks have the greatest pulling power in their price range . . . because they have a New High-Compression Valve-in-Head Engine which wrings the last ounce of power out of every gallon of fuel.

Chevrolet trucks are the most economical for all-round duty . . . because they give maximum gas and oil mileage, and will keep on serving over a long period with minimum care and attention.

And Chevrolet trucks are safer, more modern, more durable . . . because they're the only low-priced trucks with Perfected Hydraulic Brakes, New Steelstream Styling, Pressure Stream Lubrication, and extra-strong Chevrolet construction throughout.

Ask your nearest Chevrolet dealer for a thorough demonstration—today!

ADJUDICATION NOTICE

PUBLIC NOTICE is hereby given that the undersigned George B. Bartlett, Executor of the Estate of Mary Palmer, deceased, has fixed upon Tuesday, the 3rd day of August A. D. 1937, as the return day for the hearing of all claims against the above named Estate. All persons having claims against said Estate are hereby notified and requested to attend the probate Court of Lake County, Illinois, on said date at ten o'clock A. M. for the purpose of having said claims adjusted. GEORGE B. BARTLETT, Executor of the Estate of Mary Palmer, deceased. Waukegan, Ill., June 7, 1937. Runyard & Behanna, Attorneys for the Executor.

FARM TOPICS

TURKEY PROSPECTS PUZZLE BREEDERS

Too Early to Figure Cost of Feed for Poults.

By E. Y. Smith, New York State Agricultural Extension Division.—WNU Service.
A fair price for poults which will enable breeders to break even and perhaps make a little money in spite of high feed prices is the first point in the turkey outlook.

The outlook applies to those who buy poults from New York state breeders. Cornell veterinary college has found that pullorum disease is not important in the state's turkey flocks, and those tested have been found free of this disease. According to authorities in some other states, pullorum infestation is serious.

Second point in the outlook is that commercial growers will probably face higher feed prices for poults the first part of the growing season, which is not so serious because total consumption is not large during the early part of the season.

Finally, if the expected good wheat crop develops, together with a good corn crop, the probabilities are that turkey rations will be considerably lower from July on through the growing season. Since that is when turkeys eat the most feed, a reduction in price is more important at that time.

These facts indicate a "more favorable" condition for the 1937 turkey grower, though not a "particularly favorable" one.

Portable Brooder House Favored by Specialist

A round - roof portable brooder house, lighter in weight and easier to move than the ordinary shed-roof type may well be one of the factors in the success of the farm poultry enterprise in 1937, according to Cora E. Cooke, extension poultry specialist, University Farm, St. Paul.

Besides being more portable, the house is easier to heat, because of the smaller amount of head space. Another advantage is the window arrangement, for on all four sides there are two windows of barn-sash size. The windows distribute light over the floor evenly, preventing crowding and the development of too much heat from the sun in one place. The window arrangement also provides ventilation to fit all weather conditions. In hot weather windows on the four sides may be opened to allow for excellent cross ventilation.

A double floor, which protects the young poultry from cold, is 12 by 14 feet—large enough to accommodate 400 baby chicks or 250 young turkeys. The matrix, or form, for the round roof is easily made by fitting 1-inch material together.

Sloping roosts are constructed along the sides. A 500-chick brooder stove may be used in the house. Feeding porches, 12 by 14 feet, may be attached to the house. For chicks, 1-inch mesh wire should be used; for turkeys, 1 by 2-inch mesh.

Discing for Lespedeza

Korean lespedeza may be seeded safely in oats by discing or drilling the seed into the soil with the oats or after the oats have been seeded. The method of seeding may be similar to that of red clover in wheat, with oats or in thin pastures, says the Indiana Farmer's Guide. Most seedings are broadcast and covering more than an inch in depth may prohibit germination of the lespedeza. If the seed is to be disced into the ground with oats, cover as lightly as possible.

Raising Broiler Birds

The cross of Rhode Island Red hens and Barred Rock males is a popular broiler bird. It is said that they grow faster and are easier to raise than most pure breeds. Broilers are started on a chick starting ration and can be given hard grain after a short time or raised on an all mash feed. A special broiler ration gives well fleshed birds. The loss in dressing broilers ranges between 13 and 14 per cent.

Down on the Farm

The estimated 1936 production of hay in the United States is 70,165,000 tons.

Approximately 4,000,000 acres of Texas land were terraced or contour in 1936.

Wool increases greatly in value, the same as any farm product, when it is properly grown and prepared for market.

Any large-scale war against rats should be started with poison, gas, or blocking; never with traps.

There are two kinds of soil erosion—that caused by wind and that caused by water.

Good pasture reduces the cost of feeding live stock. Agronomists at Ohio State university say that money spent for pasture improvement should be classed as an investment rather than as an expense.

POULTRY

CAN REDUCE COST OF POULTRY FEED

May Replace Costly Rations With Soybean Meal.

By R. E. Gray, Poultry Department, Ohio State University.—WNU Service.

Poultrymen can reduce the costs of rations for chicks and for the laying flock by substituting pressure-cured soybean meal for part of the high priced ingredients that are used to furnish the birds protein.

Dried milk and meat scraps, two common materials used to furnish protein in poultry rations, cost more than the soybean meal; and the cost of the ration for laying hens is very important at this season of declining egg prices. The soybean meal can be used to replace at least one-half of the meat scrap and to reduce the amount of dried milk to 2 per cent of the laying ration. From 3 to 5 per cent of dried milk should be kept in chick rations.

Ground soybeans containing the natural oil cannot be used successfully as poultry feed, but the meal produced at mills where the oil is extracted is satisfactory except that a mineral mixture should be added. The mineral mixture can be made of 40 pounds bone meal, 20 pounds limestone, and 20 pounds salt. This mixture should be used at the rate of one pound to every five pounds of soybean meal.

At present market prices, dried milk is selling for five times as much as soybean meal and meat scraps are nearly twice as expensive. Decreasing the amount of milk in the ration will lower the vitamin G content but this can be supplied by feeding green grass, good legume hay, or alfalfa meal.

Early Care Basis for Future Flock Profits

The future success of the poultry flock depends a great deal upon the care and management of growing chicks in the spring. Give them proper care and they will grow into strong, vigorous, profitable birds.

Some of the fundamentals to observe while the chicks are young were pointed out as follows:

Do not overcrowd. See that there are not more than two chicks for each square foot of floor space in the brooder house.

Provide two half-gallon drinking fountains for each 100 chicks. One five-foot mash hopper will be enough for each 100 chicks during the first three weeks.

From the age of three weeks until they reach broiler size, each 100 chicks should have two mash hoppers four inches high, six inches wide, and five feet long.

Inadequate feeding and drinking facilities is one of the worst faults in poultry raising.

Have adequately controlled ventilation. More chicks are killed or weakened by overheating than by chilling.

Keep the feed hoppers filled with a well balanced mash.

Aim to have the chicks consuming about equal parts of mash and scratch feed at the sixth week.

Maintain rigid sanitation.

Cull all slow developing chicks. These seldom "come through" and prove profitable.

When the weather permits, get the chicks out on the ground. A great deal of benefit is gained from sunshine, green feed, and fresh air.

Use Clean Dry Litter

Straw is not the best litter there is for baby chicks. Out hulls, peat moss, finely ground corn cobs, shavings, etc., are said to be better. If merely the "best" litter were the only consideration not much would be left to say on the subject. The facts are farmers have to get by as cheaply as possible and at the same time strive for good results. It is true that wheat and oat straw becomes damp quickly and if not chopped up fine is too coarse for small chicks, yet on most farms it is by far the cheapest litter available, is grown on the farm and requires no outlay of cash. That good results can be had by using it is indisputable. The important thing about it is to use plenty—change it often.

Poultry Notes

A good lighting system in the poultry house increases the annual production of the birds.

Eggs from yearling hens are best for hatching, as breeding stock must be fully matured to obtain strong, healthy chicks.

The poultry industry is a sizable business, worthy of best efforts whether in research, teaching, production or marketing.

Hens should be kept housed in winter, but should have straw to scratch in, so they may exercise.

The upkeep of a flock of bantams, large or small, is about half the cost of a like amount of regular size poultry. They eat little more than a pigeon.

Ten per cent or more of the pullets can be culled from the flock at the end of the first laying season without materially affecting the number of eggs produced.

MILLBURN

George Edwards who suffered a slight stroke Wednesday morning, is very much improved.

Hickory Unit of Home Bureau will meet at the home of Mrs. Gordon Bonner Thursday afternoon, June 17.

Fifteen members of the Millburn Maidens 4-H club met at the school house Wednesday afternoon, June 9th. Ruth Glenn gave a demonstration on "Thumb-testing of Materials." A talk on Slip Materials and Slip Patterns" was given by Lois Bonner. Thelma Clark recited "The Daffodils." Beryl Bonner gave a talk on "Posture as Seen in Nature." After discussion on proper clothes suitable for the occasion and the individual, a spell down was enjoyed and won by Beryl Bonner. The next meeting will be June 23rd.

Many from Millburn attended the "open house" at the home of Mr. and Mrs. Lloyd White of Waukegan, who were celebrating their 25th wedding anniversary on Sunday.

Mr. and Mrs. W. W. Bonner and son, Harold, Miss May Dodge and Gordon Bonner were callers at the R. G. Murrie home at Russell Sunday.

William Bauman who has been attending school in Ames, Iowa, returned home Thursday for the summer.

Clarice Minto, one of the delegates from the Girls' Athletic Association of Antioch High School, is spending this week at Camp at Lake Geneva, Wis.

Mrs. E. A. Martin and son, Richard spent Tuesday in Chicago.

J. H. Bonner, who has been ill for three weeks, is improving.

Mrs. Alice Fenlon and daughter, Miss Addie, of Grayslake were callers at the George Edwards home Thursday evening.

Leon Lucas of Antigo, Wis., is visiting at the home of his aunt, Mrs. Ida Truax.

Miss Marion Edwards of Champaign is spending several weeks at the home of her parents, Mr. and Mrs. F. G. Edwards.

Mr. and Mrs. Bert Wienecke of Sycamore, Ill., called on friends at Millburn Sunday.

Mrs. E. A. Martin and Richard spent Friday in Milwaukee.

Lyman Thain is on the sick list.

Growing Business

It doesn't get publicity, but the fastest growing business in America must be the straightening out bent fenders.

Of course these modern names for the kiddies are all right but wouldn't it be terrible about forty years from now if we were to get a President whose first name was Junior?

Well, the Bible tells us the earth was created in six days, which indicates, anyhow, that it wasn't a PWA job.

Our minister tells us that the man who is known as an outstanding liberal in politics doesn't always follow out his principles when the collection plate is passed on Sunday morning.

They used to talk about the long arm of the government but the way it's interfering with private business now perhaps we ought to say the long nose of the government.

When we see some of the changes that are proposed for the government nowadays we feel certain that William J. Bryan in his youth was an ultra-conservative.

Idea of Some Astronomers
Some astronomers regard the Milky Way as the plane of a spiral nebula, with the earth located in one of the arms.

Give Dad a Tie

You will be surprised at the large selection in all the new patterns.

50c 65c \$1.00

Also for Dad:
